Contents of volume 40

Research Papers

Statistical distribution of water-particle velocity below the surface layer for finite water depth
J.-B. Song and Y.-H. Wu 1

A hybrid Boussinesq-panel method for predicting the motion of a moored ship
H.B. Bingham 21

A one-dimensional model for undertow and longshore current on a barred beach
Y. Kuriyama and T. Nakatsukasa 39

Experimental study of 2D scour and its protection at a rubble-mound breakwater
B.M. Sumer and J. Fredsøe 59

Book Review 89

Research Papers

Bed frictional characteristics in a turbulent flow driven by nonlinear waves
M.A. Cotton and P.K. Stansby 91

Coastline changes nearby harbour structures: comparative analysis of one-line models versus field data
M. Szmytkiewicz, J. Biegowski, L.M. Kaczmarek, T. Okrój, R. Ostrowski, Z. Pruszak, G. Różyński and M. Skaja 119

Annual variation in the net longshore sediment transport rate
J.S. Schoonees 141

Research Papers

Wave height distributions on shallow foreshores
J.A. Battjes and H.W. Groenendijk 161

Empirical formula for breakage of Dolosse and Tetrapods
H.F. Burcharth, K. d'Angremond, J.W. van der Meer and Z. Liu 183

Concrete strength and durability of prototype tetrapods and dolosse: results of field and laboratory tests
L. Franco, A. Noli, P. De Girolamo and M. Ercolani 207

Water waves over a muddy bed: a two-layer Stokes' boundary layer model
C.-O. Ng 221

A review and assessment of longshore sediment transport equations for coarse-grained beaches
E. Van Wellen, A.J. Chadwick and T. Mason 243

Erratum

Erratum to "Wave evolution over submerged sills: tests of a high-order Boussinesq model" [Coastal Engineering 37 (1999) 57–96]
M.F. Gobbi and J.T. Kirby 277

PII: S0378-3839(00)00048-X

Editorial
Special Issue on Probabilistic based models for coastal studies
C. Guedes Soares 279

Research Papers
Field measurements of coastal waves and currents in Portugal and Greece
M. Paillard, M. Prevosto, S.F. Barstow and C. Guedes Soares 285
Bivariate autoregressive models for the time series of significant wave height and mean period
C. Guedes Soares and C. Cunha 297
Modelling the long-term time series of significant wave height with non-linear threshold models
M.G. Scotto and C. Guedes Soares 313
Probability distributions for maximum wave and crest heights
M. Prevosto, H.E. Krogstad and A. Robin 329
Modelling distributions of significant wave height
J.A. Ferreira and C. Guedes Soares 361
Analysis of directional wave fields using X-band navigation radar
J.C. Nieto Borge and C. Guedes Soares 375
Modelling tidal currents on the coast of Portugal
P. Sauvaget, E. David and C. Guedes Soares 393
Wave hindcasting off the coast of Portugal
P. Sebastião, C. Guedes Soares and N. Booij 411
